

0	User: I need a restaurant recommendation for tonight	Request & clarification
1	Asst: Sure! What cuisine are you in the mood for?	
2	User: Italian sounds good	Constraint refinement
3	Asst: Great choice. Any dietary restrictions I should know about?	
4	User: Yes, one person is gluten-free	Option evaluation
5	Asst: Trattoria Milano has excellent gluten-free pasta options	
6	User: How's the atmosphere there?	Alternative exploration
7	Asst: It's upscale casual, good for dates or small groups	
8	User: Actually, is there something more casual?	Booking
9	Asst: Pasta House is more relaxed, also has GF options	
10	User: That sounds perfect. Can you help me book it?	
11	Asst: Of course. What time and how many people?	

GOLD + model

Exact-match F1:

Precision = $1/4 = 0.25$ (3 semantically valid boundaries counted as FP)

Recall = $1/1 = 1.00$

F1 = 0.40

-  Gold boundary (coarse)
-  Subtopic boundary (model)
